Support

Provide leadership and manage time, resources and risk (para 5 – 10 )

“Those with management or leadership responsibilities must ensure that those they are responsible for are enabled and supported to comply with the Code at all times, have the knowledge, skills and competence for safe practice and understand how to raise any concerns linked to potential or actual breaches of the Code”.

Post qualification practice

Revalidation is the process by which registered nurses and midwives are required to regularly demonstrate to the NMC that they remain fit to practise. Revalidation promotes greater professionalism among nurses and midwives and also improves the quality of care that patients receive by encouraging reflection on nurses’ and midwives’ practice against the revised Code NMC 2014
