Wednesday 20 April 2016 ICO Conference Centre, London

This conference provides a practical guide to improving practice and monitoring compliance against the NEW National Quality Standard for Healthcare Associated Infections: Prevention and Control which has recently been released.

*“Healthcare associated infections are a serious risk to patients, staff and visitors. They can cause significant morbidity to those infected and significant costs for the NHS. As a result, infection prevention and control is a key priority for the NHS.” NICE Quality Standard, Healthcare Associated Infections, February 2016*

Through National Updates from specialist advisors to the HAI Quality Standard, extended in-depth sessions and practical case studies the conference will look at implementing the national quality standard effectively in your service.
