International Practitioner Health Summit 2018

The Wounded Healer

10 Year Anniversary Conference of the Practitioner Health Service

BMJ Mental Health Team of the Year 2018

Thursday 4 - Friday 5 October 2018

30 Euston Square, London, NW1 2FB

Chair & Speakers Include:

- **Professor Sir Simon Wessely**  
  President Royal Society of Medicine
- **Dr Abigail Zuger**  
  Associate Clinical Professor of Medicine  
  Icahn School of Medicine  
  Senior Attending Physician  
  Mount Sinai Roosevelt & Mount Sinai St Luke’s Hospitals, New York City
- **Mr Henry Marsh**  
  Retired Neurosurgeon and Author  
  Do No Harm: Stories of Life, Death & Brain Surgery
- **Adam Kay**  
  Writer, Comedian & Former Junior Doctor
- **Simon Stevens**  
  Chief Executive NHS England

Supporting Organisations

Media Partner:
Aimed at doctors, nurses, pharmacists, allied health practitioners, dentists, counsellors and researchers in the field of practitioner health the 10 Year Anniversary Conference of the NHS Practitioner Health Programme will bring together the academic, clinical and experiential aspects of physician and practitioner health with a particular focus on mental health.

Sir Simon Wessely President of The Royal Society of Medicine will join Professor Clare Gerada MBE Medical Director at NHS PHP to chair the first day, and the following speakers are confirmed:

- **International Keynote Session:** Mr Henry Marsh, Retired Neurosurgeon and Author ‘Do No Harm: Stories of Life, Death and Brain Surgery’
- **International Keynote Session:** Why are Doctors in Distress? Dr Abigail Zuger, Associate Clinical Professor of Medicine, Icahn School of Medicine, Mount Sinai, and Senior Attending Physician, Mount Sinai Roosevelt and Mount Sinai St. Luke’s Hospitals, New York City
- **Keynote Closing Address:** Adam Kay, Writer, Comedian & Former Junior Doctor
- **Burnout Proof LIVE Workshop:** Dr Dike Drummond, CEO and Founder TheHappyMD.com Mayo, trained family doctor, professional coach, author, speaker and trainer
- **Changing Practice to support sick Doctors: what have we learnt?** Dr Ide Delargy, Clinical Lead, Practitioner Health Matters Programme, Dublin
- **Keynote:** Simon Stevens, Chief Executive, NHS England
- **Keynote:** The emotional impact of caring: Prof Jill Maben OBE, Professor of Health Services Research and Nursing, Workforce, Organisation and Wellbeing Research Theme, University of Surrey
- **Keynote:** A father’s experience: Dr Robin Warshafsky
- **Keynote:** Toward Preventing Physician Suicide: It Takes a Village: Prof Michael Myers, Professor of Clinical Psychiatry, Immediate Past Vice-Chair of Education & Director of Training, Department of Psychiatry & Behavioral Sciences, SUNY-Downstate Medical Center in Brooklyn, and Author, “Why Physicians Die By Suicide: Lessons Learned From Their Families and Others Who Cared”

Delegates will have the opportunity to participate in drop in question time and experiential learning and group work. We will leave time for networking at the evening drinks receptions. There will be a chance to speak to practitioner support groups and access resources to help you consider your own, and colleagues health and wellbeing needs and how these can be met.

### Day 1: STREAM A: Addiction

#### 12.00 Learning from each other about how to treat addicted doctors: ‘more carrot less stick?’

**Chair:** Jenny Keen  
**GP Practitioner Health Programme and Jane Marshall**  
**Consultant Psychiatrist South London and Maudsley NHS Foundation Trust**

This will consist of brief presentations from each speaker followed by a facilitated discussion with panellists and the audience to decide on best practice in the management of addicted doctors.

#### The Dutch System of Practitioner Health: Addicted Doctors

**Joanneke Kuppens**  
**Addiction Medicine Doctor**  
**PHP The Netherlands**

- The Royal Dutch Medical Association will publish a new rule of conduct in January 2018 ‘Zero is the Norm’. This rule of conduct states that physicians may not use drugs or alcohol during or prior to their work.
- Since 2011 the RDMA offers a physician health program (ABS-doctors) for doctors with addiction problems. Every year the number of doctors who contact the program increases (in 2017 79)
- the effects of implementing the rule of conduct on the program will be

#### No Doc Left Behind

**Gustavo Tolchinsky Wiesen**  
**Barcelona Medical Council**

- the Catalan model of ‘Caring programme for Physicians Health’ (PAIMM) provides confidential, free and high quality of attention in all settings of care (inpatient and outpatient units).
- identifying clinical features that may challenge treatment requires more in-depth communication and collaboration between team members such that treatment is tailored to the specific needs of doctors, careful not to compromise any clinical or patient outcomes

#### Practitioner Health Programme

**Dr Shivanti Sathanadan**  
**Practitioner Health Programme**

- what we found works at PHP
- what doesn’t work/pitfalls to good outcomes
- is there a difference between outcomes between in and out patient care?

#### 13.00 Questions & answers, followed by lunch and exhibition

### Day 1: STREAM B: Doctors Stories

#### A focus on surgeons and anaesthetists. Do they have special needs?

**Chair:** Rory O’Connor  
**Practitioner Health Programme**

#### 12.00 Post Traumatic Stress Disorder, intrusive thoughts and memory in surgeons?

**Helen Bolderston**  
**Clinical Psychologist & Senior Lecturer in Psychology**  
**Bournemouth University**

- presentation of key findings from research investigating the impact of adverse events on surgeons
- high levels of rumination are reported following an adverse event, with 20% of participants of a nationwide survey scoring positively on a PTSD screening tool
- do support provisions need to be adapted to improve the efficacy of formal support mechanisms?

#### 12.20 Changing the culture on night shifts – making power naps the norm

**Dr Nancy Redfern**  
**Consultant Anaesthetist and Immediate Past Honorary Membership Secretary Association of Anaesthetists of Great Britain and Ireland (AAGBI)**

- the working pattern of healthcare workers often leaves doctors at risk of fatigue and its consequences
- a national survey of anaesthetic trainees has informed a working group tasked with addressing the issue of fatigue
- Will present information about good sleep hygiene and the steps the working group is taking to improve workplace culture

#### 12.40 Historical Perspectives on Surgeons’ Emotional Wellbeing

**Agnes Arnold-Forster**  
**Postdoctoral Research Fellow, Surgery & Emotion**  
**University of Roehampton**

- modern surgery is a highly emotional enterprise
- detachment has a potentially harmful effect on surgeons’ mental health and wellbeing
- historical research has a place in policy debates about surgeons’ mental health and wellbeing

#### 13.00 Questions & answers, Interactive discussion, followed by lunch and exhibition
### Day 1: STREAM C: Promoting Resilience

**Chair:** Dr Andrew Tressider, Practitioner Health Programme  
**and Dr Caroline Walker**  
NHS Practitioner Health Programme & The Joyful Doctor

<table>
<thead>
<tr>
<th>Time</th>
<th>Session Title</th>
<th>Speakers</th>
<th>Topics</th>
</tr>
</thead>
</table>
| 12.00 | Preventing the Prevenentable: SAFEMED Stress management and resilience training  | Dr Margaret O’Rourke  
*Director of Behavioural Science and Psychological Medicine, School of Medicine*  
University College Cork, Ireland  | • responses to the stress of medical practice  
• the SAFEMED programme for stress inoculation and resilience building  
• observations on the advantages and pitfalls of such skills focused training |
| 12.20 | What is the experience for physicians of Hospital Schwartz Centre Rounds?      | Chantal Meystre  
*Palliative medicine physician and integrative psychotherapist*  
Heart of England Foundation NHS Trust  | • Raison d’etre for introduction of a Schwartz Centre Round to an acute Trust  
• Internal world of the Schwartz centre round: format and content  
• Medical attendee feedback compared to other groups |
| 12.40 | Understanding and accepting vulnerability as a positive aspect of emotional care for wounded healers | Ane Haaland  
*Lecturer*  
University of Oslo and University of Cardiff  | • is vulnerability a sign of weakness?  
• by seeing vulnerability as a crucial and positive aspect of connecting with people as human beings, medical professionals can learn to recognize, understand and handle it with awareness and respect, using emotional intelligence gained through systematic reflective learning over time.  
• such skills can improve patient safety, teamwork and professional well-being, and can contribute to reducing burnout and conflicts and increase job satisfaction |

**13.00**  
**Questions & answers, followed by lunch and exhibition**

### Day 1: STREAM D: Mistakes, Complaints and Blame Culture

**Chair:** Dr Tony Banerjee  
Practitioner Health Programme  
**And Lucy Warner**  
Chief Executive NHS Practitioner Health Programme and NHS GP Health Service

<table>
<thead>
<tr>
<th>Time</th>
<th>Session Title</th>
<th>Speakers</th>
<th>Topics</th>
</tr>
</thead>
</table>
| 12.00 | Surgeons’ responses to adverse events: self-blame, resilience and burnout following errors and complications  | Prof Siné McDougall & Kevin Turner  
*Bournemouth University; Royal Bournemouth and Christchurch NHS Trust*  | • Surgeons are more likely to make negative attributions associated with self-blame when they reflect on errors in comparison to complications arising during surgery  
• Surgeons experience anxiety and poor sleep following adverse events and generally report higher than average levels of burnout and depression  
• given that surgeons do not have higher than average levels of resilience, ways of providing better support for surgeons will be explored |
| 12.20 | Recognising and coping with psychic and somatic consequences of chronic stress in doctors charged with medical error  | Giuseppe Bersani  
*Associate Professor of Psychiatry*  
Sapienza University of Rome, Dept. of Medico-surgical Sciences and Biotechnologies  | • to be charged with a medical error is a chronic stress condition for doctors  
• mental and somatic consequences of chronic stress should be recognized, prevented and treated  
• medico-legal implications should be considered |
| 12.40 | Workplace bullying and blame  | Sarah Bolger  
*PHD Student*  
The University of Surrey  | • blame and bullying: the impact of a patient complaint  
• exploring the culture of blame in different professional groups  
• implications for practice |

**13.00**  
**Questions & answers, Interactive discussion, followed by lunch and exhibition**
### Day 1: STREAM E: Treatment Models for Mental Health Problems

**Chair:** Eleanor Cole, Practitioner Health Programme

#### 12.00 What keeps Doctors healthy? Preventive and Health Promotion Programmes

**Anna Mitjans**  
Preventive and Health Promotion Programmes Manager  
Gallatea Foundation

- psychosocial risks in doctors from data collected since 2006 about their health, lifestyles and work conditions  
- higher risk of mental disorders among health professionals than in general population in our environment, and also more risk among women than men  
- the importance of early detection and prevention

**Simon Lyne**  
Nurse Specialist and Lead for TDSS

- will talk about the new TDSS service, aimed at providing brief intervention to trainees  
- what have we found?  
- What works and what might need to be changed?

#### 12.40 CBT for an expert group - 7 years of treating GP’s: Themes, Interventions and Outcomes

**Shamira Graham**  
Director of Clinical and Business Operations  
and **Lee Grant**  
Clinical Director  
Efficacy Ltd

- Presenting problems - often longstanding due to challenges of accessing local care  
- Risk minimisation and Problem minimisation - “I am not actively suicidal”, “I am experiencing burnout, I am not depressed”. No space or time for self care  
- Consistent and high standards for patients in their care, characterised by overworking, over-checking within a system of unrealistic demands - all which culminate into a tipping point into common mental health problems  
- High unrelenting standards placed upon self in the form of perfectionistic beliefs and behaviours which at times just cannot be maintained due to excessive NHS demands - leading to beliefs such as “I am not good enough”, “I have missed something” driving self critical thoughts, lowering mood and increasing anxiety.  
- GP’s as an expert group - “I should know this” or “How did I not know this?” or “I know”.  
- Recovery and Treatment outcome data - A success story of a model that works.

### Day 1: STREAM F: Medical Students

**Chair:** Claire Gallagher, Practitioner Health Programme  
and **Dr Zaid Al-Najjar**  
Deputy Medical Director, NHS Practitioner Health Programme and NHS GP Health Service

#### 12.00 Undermining Behaviour and Bullying: Are These Issues Encountered by Medical Students as well as Doctors?

**Dr Katherine Warren**  
Clinical Teaching Fellow  
Great Western Hospital, Swindon

- experiences of undermining behaviour and bullying in students  
- 71.3% of students reported being directly affected by undermining behaviour and bullying at least once during their time at medical school, with 82.4% reporting that they had witnessed such events  
- 55% of students who had experienced or witnessed such events did not report this to anyone. A commonly cited reason for this was a belief that no action would be taken

#### 12.20 Pride or Prejudice? The Role of Ethnicity and Culture in the Mental Health and Professional Development of Medical Students

**Diana Bass**  
Kings College London and University of Exeter

- Research has shown that medical students are more vulnerable to mental illness and psychological distress than other students and find it more difficult to ask for help. This research project explores some reasons for this, and also considers several high-profile research studies that delineate a significant attainment gap between BAME + students and their white peers

#### 12.40 Supporting students with mental health concerns

**Dr Margaret Bunting**  
Director of Student Support  
Norwich Medical School

- research findings on resilience and incorporate this into an information gathering format when advising students  
- influences on academic performance  
- explore how a proactive academic advising stance for students with declared mental health conditions can support a student to gain insight and understanding of their condition

13.00 Questions & answers, followed by lunch and exhibition
Day 1: STREAM G: Pure Research (The Evidence Base)

Pure Research - the evidence base
Chair: Jenny Keen GP Practitioner Health Programme

14.15 ‘Care Under Pressure’: a realist review of interventions to tackle doctors’ mental ill-health and its impacts on the clinical workforce and patient care
Dr Daniele Carrieri
Research Fellow
University of Exeter Medical School

• There is a large literature on interventions that offer support, advice and/or treatment to sick doctors. However, the evidence has not been reviewed in a way that takes account of the complexity and heterogeneity of these interventions, and the many dimensions (e.g. individual, organisational, socio-cultural) of the problem.
• We are reviewing this literature and involving stakeholders to understand when and why doctors develop mental ill-health, why some strategies to reduce mental ill-health are more effective than others, and in what contexts.
• With this paper, we aim to discuss the results from the review, and to incorporate feedback from the clinical and academic audience of the conference.

14.35 Do Doctors self-medicate?
Dr Ornella Corazza
Reader in Substance Addictions and Behaviours
and Shanna Marrinan
University of Hertfordshire

• The results of pilot study among doctors working in hospital and mental health settings in Hertfordshire.
• Provide a correlation between work-life balance, stress and coping strategies.
• Insights on doctors’ ideal life-styles.

14.55 Measuring anxiety - Do we over pathologise?
Professor Debbie Cohen OBE
Director, Student Support and the Centre for Psychosocial Research, Occupational and Physician Health Cardiff University School of Medicine

• HADS: an appropriate tool for use in a medical student population, however, cut-off points for ‘caseness’ should be reviewed.
• Care must be taken not to over-pathologise medical students’ normal responses to stressful situations.
• Understanding how different cohorts interpret items within a population-based survey.

Day 1: STREAM H: Reflective Practice

14.15 Contemplative Group Dynamics for Attention to Self and Others
Dr Jale Cilasun BM FRCPsych
Consultant Medical Psychotherapist and Group Analyst
South West London and St Georges Mental Health Trust
and Lawrence Ladden PhD
Clinical and Health Psychologist
Private Practice

This will be a demonstration involving participants on how group work can improve well being amongst doctors.
• Mindfulness cultivates attention both to self and others.
• Mindfulness relates to empathetic responsiveness.
• The group or team as a context for mindfulness-awareness practice.

15.30 Tea and networking
Day 1: STREAM I: Resilience and Healthy Workplaces

Chair: Claire Gallagher  Practitioner Health Programme
and Dr Zaid Al-Najjar  Deputy Medical Director NHS Practitioner Health Programme and NHS GP Health Service

14.15 Supporting leaders and managers for organisational well-being and resilience – a case study of a workplace intervention

**Dr Robyn Vesey**
Organisational Consultant, Tavistock Consulting
Tavistock and Portman NHS Foundation Trust

- a group of senior managers were supported during a re-structure through externally facilitated individual and group sessions
- the benefits of this project at one-year evaluation demonstrated that focusing on supporting leaders to manage well enabled successful change on a number of indicators
- the systems-psychodynamic approach can support leaders in taking up their management roles in ways that promote organisational well-being and resilience

14.35 A Reorientation to Improved System-Based Management as an Effective Support Mechanism

**Professor P. Spurgeon** Emeritus Professor, Medical School
and Miss Sabrina Hussain  Research Assistant
University of Warwick

- better management of work systems would support more individuals
- Medical Engagement provides the positive culture to achieve this
- evidence of its effectiveness is presented

14.55 The Wounded Healer: a successful teaching session at Southampton

**Kathleen Kendall**
Associate Professor in Sociology as Applied to Medicine
The University of Southampton

- a critical examination of teaching on the wounded healer to year 2 medical students
- sharing of curriculum resources and findings on good practice
- recommendations for carrying our work forward with colleagues across medical schools to further develop a community of practice

15.25 Interactive Discussion
15.30 Questions & answers, followed by tea and exhibition

Day 1: STREAM J: Getting the balance right

Chair: Dr JS Bamrah  Consultant Psychiatrist and Chairman BAPIO
and Lucy Warner  Chief Executive NHS Practitioner Health Programme and NHS GP Health Service

14.15 Wounded healer, wounded team: The forgotten, overlooked and injured

**Dr Megan Joffe**
Psychologist, Health Practice Lead
Edgecumbe Consulting
with Barbara Wren
Chartered Psychologist and Edgecumbe Associate

- a wounded healer without insight and effective management can create a wounded team with complex interpersonal dynamics
- the risks for and effects on team members, team performance and patient safety
- interventions need to take account of the individual and their ongoing reciprocal relationship within the team context

14.35 How to support doctors under investigation

**Jessica Whitehead**
Specialty Registrar in Occupational Medicine
East Kent Hospitals University Foundation Trust

- investigations of Serious Untoward Incidents (SUIs), allegations and complaints can have a psychological impact on the employees involved. These can include; lack of confidence, low mood and anxiety symptoms.
- management and peer support are important but currently our Trust is lacking organised support systems.
- a protocol is being formalised to ensure easily-accessible avenues of support.

14.55 How to get Dutch doctors the care they need

**Hans Rode**
Medical Director/Psychiatrist ABS-doctors
The Royal Dutch Medical Association

- despite several initiatives to take care of impaired physicians by the Dutch Physician Health Program (ABS-artsen), few physicians call for help and many physicians call for advice how to help and address colleagues who seem unfit to practice
- there are well-known and understandable factors in the medical culture creating barriers for doctors to assess, address and help impaired colleagues
- developing a structural plan and using a checklist has shown to be effective in helping physicians address impaired colleagues in order for them to get help and treatment

15.15 Questions & answers, followed by tea and exhibition
Day 1: STREAM K: Mindfulness

14.15 Mindfulness

Dr Stephanie Jackson
GP assessor for GP Health, Training Programme Director Cornwall GP VTS Scheme, Sessional GP, Mindfulness teacher
Bangor University

and Tamara Russell
Clinical Psychologist and Mindfulness Trainer
Mindfulness Centre of Excellence, London

Join GP Stephanie Jackson and psychologist Tamara Russell for an interactive exploration of mindfulness and self-care. This workshop will present different ways to engage with mindfulness in everyday life and work. You can learn about the current research as well as insights from their combined wealth of experience teaching these self-care practices to healthcare professionals. You will experience a variety of micro mindfulness practices and reflect on where and when these could support your well-being.

15.30 Questions & answers, Interactive discussion, followed by tea and exhibition

Day 1: STREAM L: Wounded Medical Student

Wounded Medical Student

Chair: Simon Lyne Practitioner Health Programme
and Richard Jones Clinical Director NHS Practitioner Health Programme and NHS GP Health Service

14.15 Evaluation of Health and Wellbeing in Medical Students

Dr Margaret O’Rourke
Director of Behavioural Science and Psychological Medicine, School of Medicine
University College Cork, Ireland

• an evaluation of health, wellbeing and resilience in medical school, with a specific descriptive focus on medical student need and potential targets for intervention through stress management and resilience training strategies

14.35 Schwartz rounds: building compassion and resilience

Dr Gundi Kiemle
Academic Director, Doctorate in Clinical Psychology
University of Liverpool

• multi-professional Schwartz Rounds for pre-qualification healthcare students
• Results from ongoing qualitative and quantitative research and evaluation of the impact of the Rounds on students
• the role of Schwartz Rounds in facilitating the development of compassionate and resilient healthcare practitioners during pre-qualification clinical training

14.55 Evaluating the mental health literacy of medical students

Marrison Stranks
Medical Student
University of Buckingham

• The concept of mental health literacy encompasses knowledge and attitudes towards mental health that aid in the recognition of, and help-seeking for, mental illness
• Medical students are an important population in which mental health literacy should be evaluated, as it may impact medical students’ ability to seek help for mental health difficulties as well as care for themselves and patients
• the results of a study evaluating the mental health literacy of medical students at the University of Buckingham Medical School using the Mental Health Literacy Scale

15.15 Questions & answers, Interactive discussion, followed by tea and exhibition
08.00  Start the Day with the BMJ

The Editor of the BMJ will host a discussion around the solutions to improving the well being of doctors. The panel will include patients, practitioners and others

- Anne-Marie Doyle  Consultant Clinical Psychologist Royal Brompton and Harefield NHS Foundation Trust
- Lucy Warner  Chief Executive NHS Practitioner Health Programme and NHS GP Health Service
- Dr Henrietta Bowden-Jones  Consultant Psychiatrist CNWL NHS Trust & President Medical Women’s Federation

09.00  Tea and coffee

09.15  Chairman’s Introduction

Fiona Godlee  Editor BMJ

09.25  Keynote: The emotional impact of caring

Prof Jill Maben OBE  Professor of Health Services Research and Nursing, Workforce, Organisation and Wellbeing Research Theme University of Surrey

- the emotional impact of work and what we should do to address these issues

09.45  Question and answers

10.00  Keynote

Simon Stevens  Chief Executive NHS England

10.10  Keynote: A father’s experience

Dr Robin Warshafsky
Facilitated by: Kaji Sritharan
Consultant Vascular Surgeon and Associate Dean Royal Society of Medicine

- Losing my son to the system
- what have I learnt

10.40  Question and answers, Followed by tea and coffee break at 10.45

11.05  The development of expert biographies in medical writing

Amy Wilson
Medical Student
University of Sheffield

- contextual analysis of the emergence and changing content of physicians writing about and publishing their own illness experiences narratives over the 20th century.
- over the last 100 years the number and prominence of physicians writing about their own illnesses (especially mental health conditions) has increased.
- the emergence and subsequent increase of autobiographical ill doctors over the last century is contextualised with wider understandings of medical practice and illness.

11.25  Burnout Proof LIVE Workshop: Proven tools to lower stress levels, build more life balance and a more ideal practice. Bust three burnout myths to burnout proof your career

Dr Dike Drummond
CEO and Founder TheHappyMD.com
Mayo Trained Family Doctor
Professional Coach, Author, Speaker and Trainer

This LIVE Workshop will discuss
- the quadruple aim blueprint strategy for organization-wide burnout prevention
- burnout proof LIVE: interactive training

12.50  Lunch and exhibition with The Singing Healer performance in the auditorium

14.10  CONFERENCE CONTINUES & SPLITS INTO BREAKOUT STREAMS

15.30  TEA & COFFEE BREAK & EXHIBITION

Final Joint Sessions

15.55  Keynote: Toward Preventing Physician Suicide: It Takes a Village

Prof Michael Myers
Professor of Clinical Psychiatry & Immediate Past Vice-Chair of Education & Director of Training in the Department of Psychiatry & Behavioral Sciences SUNY-Downstate Medical Center in Brooklyn & Author “Why Physicians Die By Suicide: Lessons Learned From Their Families and Others Who Cared”

- biopsychosocial risk factors for mental illness and suicide in physicians
- how stigma works against recognition of illness in physicians themselves and confounds help-seeking and adherence to life-saving treatments
- systemic, institutional, intercollegial, familial and individual changes that must occur to stop physicians from killing themselves

16.25  #AndMe - changing minds about mental health

Louise Freeman
Vice Chair DSN

- A cross professional anti stigma campaign
- Positive senior role modelling within healthcare professions to reduce the stigma of mental ill health

16.30  Question and answers

16.35  Next Steps, Consensus Statement

Dr Clare Gerada  Medical Director NHS Practitioner Health Programme

17.05  Question and answers, then Close
Day 2: STREAM A: Burnout Workshop

14.10  Poor Leadership causes Burnout - Tools to Stop the Madness

Facilitator: Dr Dike Drummond
CEO and Founder TheHappyMD.com
Mayo trained family doctor, professional coach, author, speaker and trainer

1) Leadership Power Tools - the universal skill set to engage your teams. This is the exact opposite of a physician's natural leadership style.
2) Healthcare Workers Guide to Navigating Bureaucracy ... or "How To Manage Your Boss"

15.30  Questions & answers, followed by tea and exhibition

15.40  Short grab a coffee and bring it back coffee break

Day 2: STREAM B: Looking after oneself

Students and Prison Doctors - what can we learn from two different groups?

Chair: Eleanor Cole Practitioner Health Programme

14.10  The Importance of Mental Health Literacy in Medical Students: Results of a Study Evaluating the Mental Health Literacy of Medical Students at the University of Buckingham

Marrison Stranks
Medical Student
University of Buckingham

• the concept of mental health literacy encompasses knowledge and attitudes towards mental health that aid in the recognition of, and help-seeking for, mental illness
• Medical students are an important population in which mental health literacy should be evaluated, as it may impact medical students' ability to seek help for mental health difficulties as well as care for themselves and patients.
• this presentation will present the results of a study evaluating the mental health literacy of medical students at the University of Buckingham Medical School using the Mental Health Literacy Scale.

14.30  Developing support structures for healthcare professionals working within prison settings

Andrew Shepherd
Clinical Lecturer
University of Manchester

• prisons represent complex sites for professionals to engage in clinical work
• rates of staff turnover and 'burnout' are high in such institutions
• developing adequate support structures is essential if clinical work is to be delivered to a standard that benefits the vulnerable population contained within these institutions.

14.55  All work and no play: would establishing a collegiate culture for the University of Bristol academies improve student wellbeing?

Rhian Sheppeard
Doctor CF-1
Gloucestershire Hospital NHS Trust

• the negative impact of studying medicine on student wellbeing and these challenges are also faced by my local teaching base
• changing the culture of the medical school
• improving student wellbeing and ensuring they have the tools to maintain their wellbeing early on in their career

15.20  Questions & answers, followed by tea and exhibition
Day 2: STREAM C: Resilience and Recovery

Resilience and Recovery

Chair: Richard Jones Clinical Director NHS Practitioner Health Programme and NHS GP Health Service
and Dr Caroline Walker NHS Practitioner Health Programme & The Joyful Doctor

14.10 An RCT of Positive Mental Training and a positive factor analysis
Alastair Dobbin
The Foundation for Positive Mental Health
- resilience and recovery
- an RCT of Positive Mental Training for emotional distress.
- presentation of the findings

14.25 Healing the Wounded Healer
Richard Jones
Clinical Director
NHS Practitioner Health Programme and NHS GP Health Service
- life is a journey of learning
- we are all wounded healers
- understanding of human software and the rules of life can help us navigate life more effectively

14.40 Improving the Well-being and Efficiency of Healthcare Professionals: Benefits of workplace wellness programs
Lena Perez
Assistant Professor
Long Island University
- improving wellness and efficiency of healthcare professionals
- alternative health strategies at the workplace: Improving body and mind
