Exhibiting at this conference:

Pearl Scan Solutions (Group) was founded in 2003 to support organisations that face critical document management issues and challenges in their desire to go paperless and become more efficient. Since then, we have grown into a leading national document scanning services provider that delivers the highest quality document scanning and data capture services, enabling our clients to successfully unlock the true value of the information contained in their files, resulting in increased productivity, performance, competitive advantages and in most cases significant reductions in cost.

ibml is a global provider of end-to-end information capture solutions, combining our ImageTrac® intelligent scanners and other scanners with our advanced capture software and services. Every day, our solutions are used in over 45 countries in the most demanding document capture environments to reduce document preparation, speed up access to data, reduce exceptions, and improve operational control and visibility.

We are information capture experts who are focused on solving the operational requirements and challenges of capturing content from documents, and providing the most accurate and complete data possible to back-end content management and enterprise applications. We provide the highest performing scanning and capture hardware and software solutions on the market.

We back up this unique approach with a company culture of customer satisfaction, and an adaptable and knowledgeable team. Whether it's ibml product development, marketing, manufacturing, sales, delivery or support, operational excellence underlies everything we do.
